#### **DETAILED ACTION**

### **Drawings**

- 1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the unit transmitting a request packet, the unit managing a transmit side STA, the unit transmitting data packets as stated by claim 16, the unit adding to each of the plurality of data frames, the unit generating and the unit adding a main header as stated by claim 19; the unit checking, the unit recognizing and the unit comparing as stated by claim 24; the unit adding subheaders, the unit generating; the unit adding a main header as stated by claim 26; the unit checking and the unit cutting out as stated by claim 29; and the unit checking and the unit cutting out as stated by claim 30 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.
- 2. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the first paragraph of 35 U.S.C. 112:
  - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 4. Claims 19-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The specification fails to provide an enabling disclosure for the unit transmitting a request packet, the unit managing a transmit side STA, the unit transmitting data packets as stated by claim 16, the unit adding to each of the plurality of data frames, the unit generating and the unit adding a main header as stated by claim 19; the unit checking, the unit recognizing and the unit comparing as stated by claim 24; the unit adding subheaders, the unit generating; the unit

adding a main header as stated by claim 26; the unit checking and the unit cutting out as stated by claim 29; and the unit checking and the unit cutting out as stated by claim 30 since these unit are not disclose, shown or interconnected to overall apparatus.

# Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 4-15 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

A 35 USC § 101 process must (1) be tied to another statutory class (such as a particular apparatus) or (2) transform underlying subject matter (such as an article or materials) to a different state or thing. If neither of these requirements is met by the claim, the method is not a patent eligible process under 35 USC § 101 and should be rejected as being directed to non-statutory subject matter. Thus, to qualify as a 35 USC § 101 statutory process, the claim should positively recite the other statutory class (the thing or product) to which it is tied, for example by identifying the apparatus that accomplishes the method steps, or positively recite the subject matter that is being transformed, for example by identifying the material that is being changed to a different state. *Diamondv. Diehr*, 450 U.S. 175, 184 (1981); *Parker* v. *Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk* v.

Benson, 409 U.S. 63, 70 (1972); Cochrane v. Deener, 94 U.S. 780,787-88 (1876). In re Bilski, 88 USPQ2d 1385 (Fed. Cir. 2008)

#### Response to Arguments

7. Applicant's arguments filed December 22, 2009 have been fully considered but they are not persuasive.

Regarding the drawings, until Applicant's attorney does direct one to one correspondence between the elements in the drawings and the recited units to the Examiner, since for the Examiner it is **NOT** readily understood from the specification and the drawings. Until such a full and concise explanation from attorney, the objection shall remain.

A definition of a "unit" is "a single thing or person or group that is a part of a whole **or** a part or arrangement of parts performing one function (a train drawn by two diesel units)" Claiming "units" in an apparatus one expect to see a single thing or arrangement of parts performing that claimed function.

Enablement requirement of 35 USC 112 is satisfied if the specification contains description that enables one skilled in the art to make and use the claimed invention (Fiers v. Sugano, 25 USPQ2d 1601). The examiner, in holding that disclosure is not enabling, can rely upon sound scientific reasoning as acceptable alternative to patents and printed publications. Lack of working examples is not controlling in determining whether disclosure meets enablement requirement of 35 USC '112. A patent applicant who chooses to forego

Art Unit: 2617

Non-Final Rejection.DOC

exemplification and bases utility on broad terminology and general allegations runs risk that, unless one with ordinary skill in art would accept allegations as obviously valid and correct, examiner may properly ask for evidence to substantiate them (Ex parte Sudilovsky, 21 USPQ2d 1702).

It is **NOT** understood by the Examiner the applicants' attorney's arguments which units is performing each of the different functions. Until the attorney does, the Examiner shall not grant a monopoly rights on such deficient claims.

# Allowable Subject Matter

- 8. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
- 9. Claims 1-3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

10. If applicants wish to request for an interview, an "Applicant Initiated Interview

Request" form (PTOL-413A) should be submitted to the examiner prior to the interview

in order to permit the examiner to prepare in advance for the interview and to focus on

the issues to be discussed. This form should identify the participants of the interview,

the proposed date of the interview, whether the interview will be personal, telephonic, or

video conference, and should include a brief description of the issues to be discussed.

A copy of the completed "Applicant Initiated Interview Request" form should be attached

to the Interview Summary form, PTOL-413 at the completion of the interview and a copy

should be given to applicant or applicant's representative.

11. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to WILLIAM D. CUMMING whose telephone number is

571-272-7861. The examiner can normally be reached on Tuesday- Friday, 11:00am-

8:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Dwayne Bost can be reached on 571-272-7023. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

12. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
